

Best solar company in Kerala

Date : june 28, 2022

Murickens Group is one of the best solar company in Kerala. We Manufactured every one of the items are under the brand name of Flyline. Murickens Group is entered in to the solar field since 1975. Murickens place 1st position in the list of kerala solar companies. Our main solar products are Solar on grid inverters, solar off grid inverters, solar street lights, servo stabilizers etc.

Different types of solar inverters are available in Kerala solar industry. They are mainly used for commercial as well as home purposes. Different capacity solar inverters are used based on consumption of energy. Solar inverters are

mainly used to reduce electricity bills. Main components of solar power plants are 1, solar panels 2, inverters 3, Battery.

What Are The Different Types of Solar Inverters?

1. Solar Off grid inverters-Off-grid solar systems work freely of the grid yet have batteries which can store the sunlight based power created by the solar panels. This solar inverter system normally comprises of solar panels, battery, charge regulator and inverter.

2. Solar On-grid inverters-On grid solar inverter otherwise called grid tie or associated solar power system is the most efficient and cost effective type of solar power plant. total arrangement of this system consist of important components are solar panels, solar on-grid inverters and other standard solar system embellishments. This framework will not gives you continious power but it will reduce your weighty power bills.
